

# CORPORATE CAPABILITIES

— MOVING SCIENCE FORWARD —

**Rose Li & Associates, Inc. (RLA)** builds communities that move science forward. Science depends on many people working in collaboration around the globe: researchers, drug and device makers, policy makers, patients, historians of science, and ethicists. RLA brings stakeholders into *face-to-face conversation* by facilitating committees, working groups, and conferences; we bring stakeholders into *virtual conversation* by developing literature reviews, summaries, and reports that circulate critical information; we *extend conversations* by developing IT solutions that support data sharing and analysis; we *bring key voices into the conversation* by conducting survey research and analysis; and we guide some of *the most important conversations of all*—strategic planning that sets the agenda of future scientific research.

Since our inception in 2003, RLA has built a reputation as a contractor of choice to more than 15 Institutes / Centers / Offices within the National Institutes of Health (NIH), the Department of Health and Human Services (HHS), the Agency for Healthcare Research and Quality (AHRQ), the Departments of Transportation, Veterans Affairs, and Education, elite academic institutions, large pharmaceutical and biotechnology companies, and influential nonprofit organizations.
